

# YEAR 1 HERALD

25<sup>TH</sup> SEPTEMBER 2009

**Numeracy-** We are learning to find pairs of numbers with a total of 10. Find 10 objects, for example, 10 cuddly toys. Look at how many ways they can be placed on 2 separate beds (i.e. 7 on one, 3 on the other is the same as  $7 + 3 = 10$ ). *Challenge:* Can they write down the number sentence?

**Literacy-** We are learning to label diagrams and write lists. Get them to have a go at labelling the furniture or the jars in the cupboard, or even write your shopping list for you! *Challenge:* Can they write a list using commas between the words?

**PE-** We are learning about moving, speed and direction. Listen to a few genres of music. How would they move when listening to this music? Get them to think about making their body move in different ways. *Challenge:* Can they move in slow, excited ways or fast, calm ways?

**Topic-** We are learning to ask questions about old objects. Find something that you owned or your parents owned as a child and talk to the children about it. Do they know what it is? Get them to think about some questions about the objects that either you know the answer or could find out using the internet or a book.

**Art-** We are learning to draw objects. Get them to sketch the old objects that you have discussed.

## Notes

- On Thursday 8<sup>th</sup> October we will be opening our class museum based on old artefacts that the children have drawn, made and labelled. It will open at 8.40am and will run until approx 9.10am. Tickets will cost 10p and the proceeds taken will buy the children a treat for their hard work.
- Can we politely request that children do not go up onto the 'bank' outside Mrs McCoy's classroom. The children have been asked in assembly to walk along the footpaths at the start and end of the school day.
- Please could we have any junk for modelling! There is a large, clear box in the conservatory that we use for junk and would be grateful for any donations!

THANK YOU!!! THE YEAR 1 TEAM
